Manual:

Users can register to the page so they can select their favourite stocks and follow only their news but it's not necessary and the page can be browsed without logging in too. The front page shows news and analysis for all of the stocks. Every news block has company name, country, time of news release, headline of news with link to the news. Lastly there is analysis section that can be enlargened with clicking mouse button.

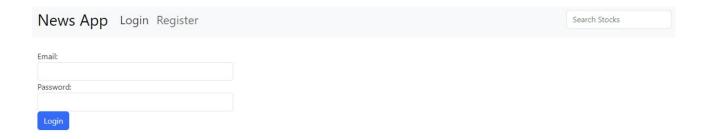

In the right side of the navbar users can search for stocks by name and click the stock which will redirect them to that stocks page.

Register	

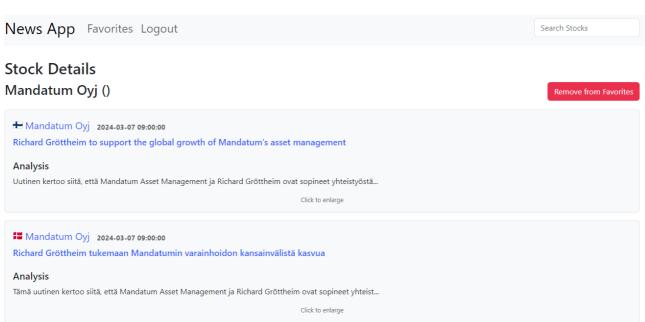

In the login page user fill out their info and press blue Login button which will redirect them to the front page.

After logging in the navbar changes to include links to Favorites and Logout. User can now navigate to stock they want to add favorites or directly to the favorites page. In the example photo user has navigated to Mandatum Oyj stock page and selected that as their favourite stock. After selecting the stock, the user can remove the stock by pressing remove from favorites.

Add favorites:

Navigating to favorites pages displays the user favorite stock and the news/analysis items for the chosen stocks. Stocks can be removed from here as well from x mark in blue boxes.
